

M-C GEMS Limited

QUALITY FINDINGS
Since 1969

GENERAL INFORMATION

TERMS

- New Accounts will be required to work on a C.O.D. basis. Once a relationship is established, terms may be arranged pending a credit application check.
- Past Due Accounts will be reverted to a C.O.D. basis.

ORDERING

- When ordering please specify page number, item number, quality codes (when applicable), and quantity (specify pieces or pairs where applicable).
- See chart for quality codes

Example:

Page 22 1985EW - 2 pairs
Page 40 1204EW - 4 pieces

- Special Orders are available on certain items if we do not stock your desired metal type or required size.

DELIVERY

- Orders received before 12:00 noon Eastern Standard Time are usually shipped same day via Fedex Economy service.
- All other orders will be shipped via Fedex Express service upon clients request.

(Shipments outside Ontario and Quebec are via Fedex Express)

RETURN POLICY

- Returns of defective merchandise will be accepted for exchange only within 10 days of invoice date if accompanied with a copy of the invoice.
- Special order merchandise, cut rubber necklaces, beads, wire, and used items are non-returnable.
- All other returns require the authorization of M-C Gems management.

Introducing the Polaris Diamond™, named after the famed North Star, the Polaris is the brightest guiding star in the sky which has been used for centuries by travellers to guide them through their journey.

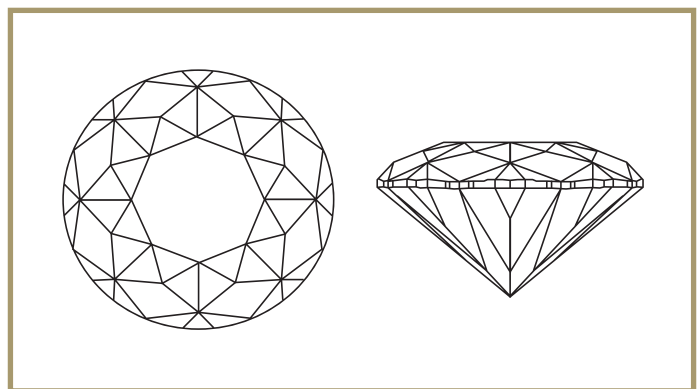

The Polaris™ is an 89-facet round diamond which is elevating the standard for diamond brilliance. Cut with 32 more facets than the standard round diamond, it includes 8 extra facets around the upper girdle, 16 extra facets around the star on the crown and 8 additional facets on the lower girdle of the pavilion. This creates a geodesic dome shape on the crown of the diamond which allows more fire, sparkle, and brilliance. This special faceting arrangement gives the consumer a perception of a higher color and clarity than the average round brilliant diamond when compared. All of which has been made possible while maintaining the industry standard of depth percentage.

The beauty of the Polaris Diamond™ has been confirmed by using the industry's latest technological standards, including the BrillianceScope® and the Firetrace™, in which the Polaris™ consistently measures at only the highest levels when it comes to brilliance, scintillation, and dispersion. These advancements have recognized that the re-engineering of a diamond with an additional 32 facets makes the Polaris™ one of the most beautifully cut diamonds in the world today.

In today's highly competitive nature of the diamond industry, give your company an advantage by carrying a product which is uniquely different.

Polaris (the jewel in a small circle of faint telescopic stars called the 'Engagement Ring' constellation)

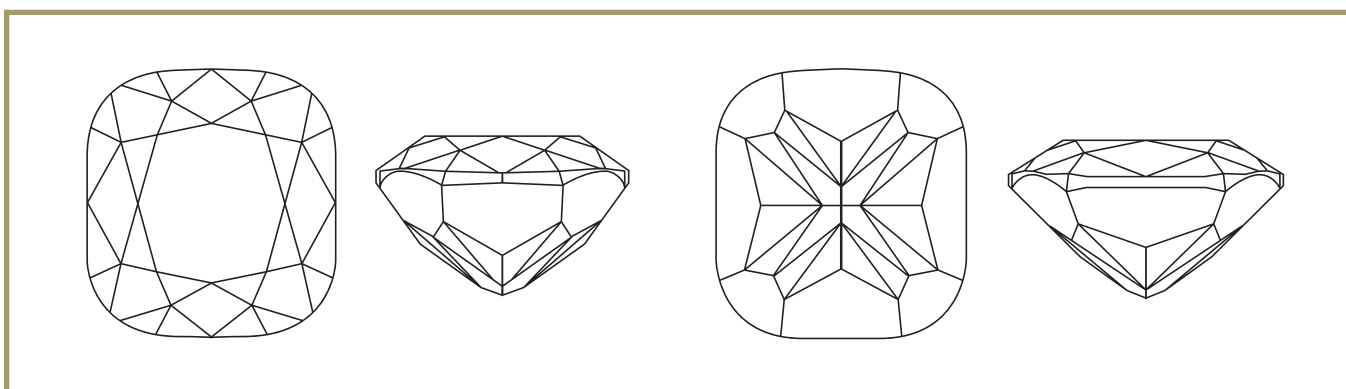

M-C Gems is the exclusive distributor of the Polaris Diamond™.

M-C Gems is proud to announce the release of our new Patra™ Cushion Cut Diamond, available in both **square** and **elongated** cuts. Extensive research and development has led to the production of the Patra™ Cushion which maximizes the ratio of perceived stone size to weight while maintaining the highest standard of brilliance.

The Patra™ begins by using only the finest rough material which is then brought to life by master diamond cutters whose exacting standards for cut, symmetry, and polish always ensures a consistency in light performance at the highest levels. The result is a cushion cut diamond with a far larger appearance and a superior brilliance to the standard cushion cut.

Prominent trend-setting retail boutiques continue to aggressively promote cushion cut diamonds along with similar variations, as a result consumer demand continues to increase and as such, the Patra™ should become an important presence in your business.

M-C Gems is the exclusive distributor of the Patra Diamond™.

'Our Quality findings have been used to create fine jewellery for over 40 years'

Available in 18Kt YG & WG

Note - All 18Kt WG listed above are Nickel free using Palladium Alloy.

R-PUSH™ PATENTED SYSTEM

Allow your customers maximum versatility, unlike the older Silicon / Polyurethane adjuster, the R-PUSH™ System is a superior spring loaded design which will not wear out over prolonged usage.

The R-PUSH™ System allows your client to adjust their chain to suit any ensemble, and is also ideal for children as it can be adjusted to their changing sizes as well. Streamline your inventory by carrying one R-PUSH™ chain length instead of 16, 18, and 20 inches.

Simply push and hold the button down on the adjuster and gently pull the chain through the mechanism in the direction you desire, release the button and the chain will lock into position.

Dear Valued Customer,

M-C Gems is proud to present to you the latest edition of our catalogue as an accolade of our serving the jewellery industry for over 40 years.

We have expanded our line extensively since our last catalogue to include such items as specialty chains, tennis bracelets, wedding bands, specialty cut loose diamonds, and a vast array of new clasps and settings just to mention a very few.

The wide selection of findings in our inventory varies from Platinum, 18Kt, 14Kt, 10Kt, Sterling Silver, Gold Filled, and Base Metals.

At M-C Gems, our findings are selected with the utmost discerning expertise in order to bring to you the latest and most innovative pieces from around the world. You can be assured of the quality, uniqueness, and beauty we provide.

As we maintain our reliance role within the industry, we are honoured to continue providing our best in product, value, and service to all our customers as we have been doing since our establishment in 1969.

Mohamad Chehab
